Portfolio

PROFESSIONAL EXPERIENCE

Junior Android Developer - InChurch

Dec/2021 - Currently

- Collaborated with the development of features in Kotlin using clean architecture and following the design and product specifications. I also made use of the new Jetpack Compose in some of them.
- Managing applications for more than 600 churches using Android flavors.
- Auxiliated in solving performance problems in the app as well as solving bugs.
- Maintenance of the company's internal app in Flutter, as well as development of new features for it.

MY PROJECTS

Finn - [github](#) / [playstore](#)

Social media based on communities and posts.

- Developed in Java following the MVVM architecture and using LiveData
- Integration with Firebase Authentication (Facebook and Google authentication options)
- Using Retrofit to make API calls along with RxJava for asynchronous data processing
- I've built the whole backend using Node.JS, Typescript, PostgresSQL, and Docker, which is running in an EC2 machine from AWS.

AmazingNote - [github](#) / [playstore](#)

Note taking application

- Developed in Kotlin and using the MVVM architecture, as well as using LiveData.
- Using RoomDB to store the notes locally as well as coroutines to perform the database operations asynchronously
- Dependency Injection with Hilt, which was fundamental in the tests constructions
- Following TDD practices. I used JUnit4, Mockito, and Espresso to build Unit, Integration, and UI tests

EDUCATIONAL HISTORY

Federal Rural University of Rio de Janeiro

Bachelor of Computer Science (Finishing date: Jun/2023)

LANGUAGES

- Portuguese
- English
- Spanish
- German (B1)
